Exterior

FOUNDATIONS AND STRUCTURE

The foundations and basement walls have been constructed in accordance with the specifications defined in the technical project, using high-strength concrete to suitable specifications, specific cement for the aggressiveness of the land, and steel in accordance with the Geotechnical Survey.

Reinforced slabs, walls and pillars using grid layout floor structures made from reinforced concrete in line with current regulations and the Spanish Technical Building Code.

FAÇADE

A singular design with white cladding conferring light and true to the Mediterranean style to make you home unique and comfortable.

The exterior cladding is composed of perforated brick, air cavity with inner insulation and laminated plasterboard partition wall dry sheeting system in accordance with the Technical Building Code and acoustic regulations DB-HE (energy saving), DB-HR (noise protection) and DB-HS (healthiness).

The balcony guardrails will be made from safety glass panes mounted over a low wall of different sizes for a modern, aesthetically pleasing look.

ROOF

The roofing has been designed to guarantee there are no leaks or damp, and will be completely waterproof.

The transitable roofs feature anti-slip porcelain tiling where required, and a gravel finish in the other areas.

WINDOW FRAMES AND OUTSIDE DOORS

Window frames are made of 1st quality lacquered aluminium with thermal bridge break, double thermal-acoustic glass, Climalit or similar, with air cavity.

Tilt, tilt-and-turn or sliding opening systems, depending on home type and technical requirements, to enjoy different ventilation options.

Interior

WALLS AND INSULATION

At “Gran Canet Residencial” we are aware of the importance of good insulation to enjoy the peace and quiet you deserve.

Separation between homes is by means of an industrialized, double self-supporting framework system with internal insulation and a layer of laminated plaster, separated by a galvanized steel sheet.

The partition walls in the homes will be made by using laminated plasterboard with insulation, ensuring compliance with thermal and acoustic requirements.

The finish on non-tiled walls and ceilings will be based on smooth, plastic paint in three colour tones to be chosen from within the **customisation programme***.

GENERAL HOMES

A single large size porcelain stoneware flooring creates a unified and harmonious style throughout your home.

Thanks to our **customisation programme***, clients may choose tiling from different options.

Continuous laminated plaster suspended ceiling throughout the home will be present, except in rooms where the installations will require easy, convenient access to facilitate handling.

The bedrooms may be fully darkened out using electric aluminium blinds in the same colour as the window frames creating a perfect combination for the façade.

Optional:

- Motorised blinds in bedrooms.
- Furnishing and decoration service for the entire apartment.

TERRACES

Floor tiling on terraces and balconies will be stone tiles in the same colour as the rest of the home, with a non-slip finish. There will also be an area for installation of a television.

INNER DOORS

Reinforced access door with security lock.

Interior doors with a smooth design and finished in white lacquer, with steel fixtures and handles.

Modular built-in closets with the same finish as the doors.

Optional:

- Wardrobes fitted with drawers, shelf and hanging rail and interior lighting.

KITCHEN

A perfect and practical room equipped with upper and lower cabinets of great capacity and high quality.

Quartz counters are colour-matched to the cabinets and have a matte white tile between upper and lower cabinets for a minimalist style. Clients will be offered two different finish options to choose from in our **customisation programme***.

Fully equipped with appliances by top brands such as Bosch, or similar, with: vitroceramic hob, oven, microwave, extractor hood, refrigerator, dishwasher and washing machine.

Optional:

- Higher brand appliances.

BATHROOMS

With a modern style and design, combining through-body porcelain wall tiles and paintings to match the general floor tiles in the home. It is possible to choose from different finish options with our **customisation programme***.

Equipped with top brand glazed porcelain sanitary fittings, anti-slip shower tray and fixed, single leaf glass shower screen in the en suite bathroom.

Designer single control taps.

Optional:

- Installation of electrical under floor heating in bathrooms.
- Sink cabinet in main bathroom.

***CUSTOMISATION PROGRAMME.** Clients will be able to choose the tiling and paintwork finishes from among the 4 ambience options created in our customisation programme.

Facilities

CLIMATE CONTROL / HOT WATER / PLUMBING

Maximum comfort and sustainability.

Following technical code DB-HS, an innovative ventilation and air renovation system covers every corner and creates a feeling of well-being.

Hot/cold climate control installation throughout the home.

Equipped with individual aerothermal hot water production, a highly energy-efficient system.

Plumbing with general cut-off valve at the entry to the home and independent stopcocks in each wet room. Includes water connection for each sanitary fitting in bathrooms and for appliances in the kitchen.

HOME AUTOMATION

The homes have home automation pre-installation.

Optional:

- Expansion according to the particular needs of the owner and the technical possibilities of the home.
- Home automation system with control functions.
- Remotely operated intelligent electronic lock.

ELECTRICITY AND TELECOMMUNICATIONS

A home connected with the world.

The homes will be fitted with basic LED lighting in all rooms.

The power and telecommunications points will be as required in the Low Voltage Electricity Regulation, with switches and sockets by leading brands.

Wiring installation with circuit-breakers and networks separated in the mains panel.

TV, telephone and internet outlets in main rooms for optimum connectivity.

Electronic colour video entry-phone for access control connected to the building's reception and guard.

MAIN ACCESS AREA

Gran Canet is an exclusive residential complex featuring the spectacular beauty of the Mediterranean.

Possibility of different size parking places for motorbikes, according to availability.

A spectacular private development with concierge, parking areas for bicycles and a garbage disposal room.

Conveniently access your new home via the electro mechanically fitted elevator directly from the car park.

PARKING, GARAGES AND STORE ROOMS

Every home has one garage space and storage room, a second garage space may be requested subject to availability.

There will be a quick charging point for electric vehicles in each block.

Possibility of different size parking places for motorbikes, according to availability.

The garage is equipped with ventilation and CO2 extraction systems, and fire detection and protection following current regulations.

Communal Areas

GARDENS

Large enclosed garden areas have a contemporary style and a Mediterranean essence. Various types of aromatic plants, citrus trees, palm trees and many other native decorative species. Automatic irrigation system and outdoor lighting.

SWIMMING POOLS AND POOL BAR

Gran Canet means quality of life. An infinite pleasure with beautiful sea views.
